

Dear Gene and Brian,

Thank you so much for your request regarding the Number Theory course #311. You had inquired if the course would meet the requirement for the history of mathematics class required for entry to the Alternative and Teacher in Residence programs for candidates wishing to be endorsed in secondary mathematics. I apologize for the delay in responding to your question and appreciate your patience.

We have reviewed the content of the Number Theory course and it does meet the content of History of Mathematics. When we have inquiries regarding options for the History of Mathematics course, we will add this class to the list of courses that meet this requirement. I think it will be appealing to candidates since the class is offered on line. I don't know if you ever offer a course as an independent study, but there is a market for that since candidates are looking for a way to meet the requirement at this time of the year when it is too late to enroll in the semester class.

If you have any questions, please feel free to contact me. My direct line is 303-866-6854.

Sincerely,

Bridget Collins-Sullivan

Supervisor
