Faculty contributions and achievements

Dr. Shon Niederlinski
Dr. Shon Niederlinski published an article in the journal Geomorphology entitled "Dynamics of the San Juan Mountains: A Computer Modeling Approach to Understanding the Evolution of the San Juan Cordillera in the southwestern United States." This article can be accessed at [link].

Dr. Sarah Brown
Dr. Sarah Brown, a faculty member in the Department of Geography and Environmental Studies, presented a paper entitled "The Role of Geology in Understanding Past Climate Change" at the annual meeting of the Geological Society of America. Her presentation was well-received and contributed to the ongoing discussion on the importance of geological studies in understanding past climate change.

Recent graduates

Our department is proud to announce the recent graduates of the Geography and Environmental Studies program. These individuals have completed their degrees and are now poised to make significant contributions to the field.

Upcoming events

Upcoming events include a series of lectures and workshops that are designed to provide students with valuable insights into various aspects of geography and environmental studies. These events will be held throughout the fall semester and are open to the public.

For more information on these events and other opportunities within the department, please visit our website.
