Pre-Physical Therapy preparation offered at UCCS prepares students for candidacy into professional programs offered at other facilities. A college program leading to a bachelor's degree is considered by the faculty and the CU School of Medicine's Committee on Admissions to offer the best preparation for a student interested in the Doctor of Physical Therapy. Students in the pre-physical therapy program are advised to choose a major and should plan to graduate with a Bachelor's degree from UCCS.

Application for the Physical Therapy program at the CU School of Medicine is available through the Physical Therapy Centralized Application Service (PTCAS). The application cycle for PTCAS begins in July. The Graduate Records Exam (GRE) is required for admission. The admissions committee assesses each applicant's credentials and makes interview selections after the deadline. Selection for interviews is by invitation only and interviews are scheduled at the end of January for the following academic year.
