Pre-CHA/PA preparation offered at UCCS prepares students for candidacy into professional programs offered at other facilities. A college program leading to a bachelor's degree is considered by the faculty and the CU School of Medicine's Committee on Admissions to offer the best preparation for a student interested in CHA/PA. Students in the pre-CHA/PA program are advised to choose a major and should plan to graduate with a Bachelor's degree from UCCS.

The CASPA and supplemental application cycle begins in April. Priority application review and interview selection for applicants with all required materials received is September 1. Selections for positions within the class are based upon applicants who appear to the committee to be highly qualified in terms of intellectual and academic achievement, character, motivation, and maturity. For this assessment, college grades and GRE scores are used as well as interviews, essays, and personal recommendations. Interviews are arranged for applicants who have a good chance of being accepted based on the applicant pool each cycle.
