Introduction

The Fall Databook reflects data extracted from the Integrated Student Information System (ISIS) at different points in time.

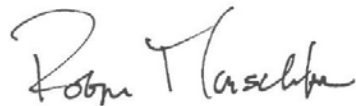

- The Fall [Census Snapshot](#) is taken within a few days of the last day students can drop courses or withdraw for a 100% refund and has usually been within the second week of September.
- The Fall [End-of-Term Snapshot](#) data are frozen several weeks after the end of the semester, usually in early January, which is expected to be enough time for final grades to have been reported to Student Records.
- Data extracted from the [Campus Solutions Warehouse](#) are specific to the day of the extraction and will differ from census or end-of-term snapshots.

Read the notes for each table to determine the point of time of the extraction. The Fall Databook will be updated in September and February, with the last update noted in the header and in the data labels shown within the tables.

Data items are included based on the frequency of requests from campus constituents. *The Fall Databook is not comprehensive nor does it reflect all the data on hand nor all the reporting handled by Institutional Research or other offices.* Contact Institutional Research directly if you have additional data requests or questions.

Student Academic Information

Career Level

A student career may be categorized as Undergraduate, Graduate, or Non-Degree Graduate. The non-degree graduate career houses students who are taking graduate-level courses but are not seeking a master's or doctoral degree; for example, they might be seeking a certificate or licensure or simply taking continuing education courses.

Primary Degree-Granting Plan

Students may have more than one academic plan and to avoid counting them more than once, **only degree-granting primary plans** are shown here. For a more exhaustive report including all primary plans, please see the [Enrollment](#) section of the IR website. For a list of state-approved degree programs refer to <http://www.uccs.edu/ir/academic-programs/degrees.html>.

Student Demographics

Gender

Gender is self-reported. For IPEDS reporting, we must assign unknowns to male or female and we do so by student's name.

Ethnicity

In 2010, the federal government issued new guidelines on how to collect and report race and ethnicity. These categories are in compliance and we often refer to these categories as IPEDS Ethnicity.

Military Affiliation

Various sources of data overlap; therefore, students with a military affiliation are counted in each category that is applicable to them: (a) any military-related tuition assistance maintained by Student Financial Services, (b) veteran and veteran dependent service indicators maintained by the Office of Veteran and Military Student Affairs, (c) residency exceptions maintained by the Office of the Registrar, and (d) self-reported military status drawn from student applications and/or the student portal.

First Generation Status

First-Generation Status is based on application and financial aid documents and is defined here as a student whose parent(s) do not have a 4-year degree. Students who have not reported the education levels of their parent(s) are not considered first-generation students due to missing data.

Pell Recipients

The number of students receiving a Pell Grant is often a proxy measure for low-income students. In order to receive a Pell Grant, undergraduate students must apply for financial aid. Data are updated several months after the end of the term when the financial aid year ends.

Class Sizes

Class size is difficult to ascertain due to the common occurrence of combined sections, team-taught sections, cross-listed sections, and dual career sections. These data shown are drawn from the Campus Solutions Warehouse and include our attempt to count unduplicated sections using a methodology that works within the parameters of the warehoused data. For example, enrollment in a combined section is assigned to the sponsoring academic organization and team-taught sections are assigned to the primary instructor. It excludes courses under Concurrent or Cross-College academic groups. Data reflect courses at the end of the term unless noted otherwise.

*The 2017 alternative column represents an alternative methodology; it includes the number of all sections by class size regardless of duplicated/combined sections. It is limited to main campus course sections.

Credit Hour Matrix

This matrix shows the credit hours taught by a college to students who may or may not be in a program managed by the same college. Refer to the term and the students' programs in the left side of the table. The columns under "Course Credit Hours Taught" represent the college teaching the course. The Total includes Concurrent and Cross-College hours not shown as columns. Data reflect activity at the end of the term.
