

10/07/2015

We are needing to meet and work on a plan to convert the Media Lab in El Pomar into an accessibility space. There needs to be a private location where confidential assistive technology assessments are conducted and where alternative media production can be performed.

Attached is a document from Ida and Leyna providing more information and a proposed plan.

Agenda:

1. Review what we are trying to accomplish
2. Discuss if the proposed plan makes the most sense
3. Define what it will take to achieve our goal
4. Build a timeline
5. Discuss cost
6. Create the funding model
7. Finally build a project
